INNOVATION VENTURES INVESTS IN BUSINESS INTELLIGENCE INTERNATIONAL

*Developer of Affordable Sarbanes-Oxley Web-based Solution
Positioned for Continued Growth*

Wilmington, DE, December 8, 2006-- Innovation Ventures, LP, with offices in Wilmington, DE and Lancaster, Pa., and Zon Capital Partners are pleased to announce an investment in Business Intelligence (BI) International, a global expert in providing the framework, structure and analytics that allow businesses to properly manage risk and performance.

"BI International is an emerging leader in the software-as-a-service space. BI has been developing software analytics and tool sets for corporate performance management and Sarbanes-Oxley," said David Freschman, Managing Principal of Innovation Ventures. "As a CPA, it was easy to see that BI's flagship product, Aline4SOX, is a one-of-a-kind combination of analytics and control and management tools via a browser-based solution. We're excited about Business International's ability to help public institutions streamline business processes, reduce costs, improve client relationships and maximize their return on investment."

As the SEC and the Public Company Accounting Oversight Board (PCAOB) continue to search for a cost-benefit balance for Section 404 and 302 compliance, smaller public companies are still expected to comply with the law, yet face the dilemma of limited resources and know-how. To that end, BI International is the first Software-as-as-Service (SaaS) player to focus on the emerging governance, risk and compliance mid-market space, notably with its Aline4SOX product, which is both affordable and easy to use.

"Having closely tracked BI's progress over the last two years we are very excited about helping them exploit their unique position in the mid-market place" said William Bridgers, managing

partner and founding member of Zon Capital Partners. "In particular, having witnessed their success in bringing the Aline™ SaaS platform to market and in leveraging the CPA and SOX Consulting channels so effectively, this funding will allow them to keep pace with the momentum they've achieved."

BI International CEO Roland Mosimann said the investment will allow BI to vigorously promote Aline4SOX. "Supplementing our already strong balance sheet, this additional capital will be used to continue the growth of the firm's global sales organization, support the rapid adoption of our products within the current customer base and to continue investing in software development," he said, adding, "we are also excited about the opportunity to re-locate our primary headquarters to Wilmington to work more closely with the many firms that base their corporate services there".

About Innovation Ventures, L.P.

Innovation Ventures, LP (IV) is an SBIC venture capital fund headquartered in Wilmington, DE and with offices in Lancaster, PA. IV is focused on growth and early-stage investments in the areas of chemicals and materials; electronic materials and devices; information technology; nanotechnology; software; biotechnology (excluding human therapeutics); and business information services related to the legal, financial services and manufacturing industries.
